- **SEO & Content Strategy:** On-page SEO, GMB Optimization, Blog Writing

Work experience

IT Project Manager (Pointili HR Solutions – Dubai, United Arab Emirates)
January 2025 – Present
Responsibilities

- Led all project management tasks, including planning, tracking, and delivering project milestones.
- Independently optimized our Google My Business (GMB) profile to improve search visibility and engagement.
- Implemented SEO strategies to attract more clients and enhance our digital presence.
- Created Software Requirements Specifications (SRS) documents for upcoming features and product improvements.
- Contributed to the design of new features for both the desktop and mobile versions of Pointili.
- Authored blog articles that supported our content marketing and user education efforts.
- Managed client communications and customer support independently, ensuring timely resolution of queries and maintaining strong client relationships.

Software Engineer (Orel IT(Pvt)Ltd - Colombo, Sri Lanka)
August 2022 - March 2024
Responsibilities.

- Designed and built scalable backend systems using Java, Spring Boot, REST APIs, and Hibernate, ensuring high performance and reliability.
- Partnered with cross-functional teams to deliver new features, applying best practices in clean code, testing, and system design.
- Optimized code efficiency and reduced bugs by 15% through rigorous code reviews and adherence to software development best practices.
- Debugged and resolved complex technical issues, improving system stability and reducing downtime.
- Mentored junior developers, boosting team productivity by 20% through hands-on coaching and knowledge sharing.
- Kept pace with emerging Java technologies and industry trends to drive continuous improvement in development processes.
- Translated business requirements into secure, scalable technical solutions, aligning development with organizational goals.

Associate Full-Stack Software Engineer (Dockyard Total Solutions (Pvt)Ltd - Colombo, Sri Lanka**)**
July 2021 – August 2022

Responsibilities

- Designed and developed responsive Windows desktop applications using C# and WPF, implementing event-driven programming for real-time interactions.
- Wrote and optimized PL/SQL queries, stored procedures, and functions to ensure fast and efficient data processing in Oracle databases.
- Developed and maintained ReactJS-based frontend interfaces, collaborating closely with UI/UX teams for intuitive and accessible designs.
- Integrated third-party APIs and services into core systems, enhancing application functionality and extending business use cases.
- Ensured high code quality through unit testing, debugging, and peer code reviews, reducing production bugs and improving maintainability.
